

## **Mechanical Technician**

**Ref: 10-019**

**Location: West Perth**

As a Mechanical Technician for ICON you will be undertaking initial engineering technical tasks, and be expected to exercise individual judgment and initiative in the application of principles, techniques and methods. Providing project execution and installation support, you will have commercial awareness associated with your role and timely interaction and reporting to the client or Project Manager as required. You will deal with and solve mechanical and logistical problems as they arise.

ICON provides a flexible and collaborative team environment where you get to take ownership of the projects you will work on, challenge yourself and develop your career. Incentives for high achievement will be provided.

### **Experience**

As a qualified mechanical technician with industry experience you will ideally be a mechanical fitter who is hydraulics focused (diesel fitter/heavy duty plant mechanic skills not required) with the ability to manage and maintain the supply chain, cost structure and quality of mechanical equipment and components. You will have experience of product delivery and implementation, including engineering drawings and BOM's and will possess good interpersonal skills with the ability to liaise and build a strong rapport with clients and third party service providers as well as be flexible for site work including onshore and offshore facilities as required. You will provide instruction and training of site personnel on the use of Icon mechanical equipment. Your good working knowledge of the Microsoft Office Suite including Word and Excel will be an excellent addition to your solid office and administration skills. This position is for commencement in February 2011 and would require you to have your own transport.

### **About Us**

ICON Engineering prides itself on providing innovative high quality solutions that exceed our client's expectations. We are a market leader in the provision of front end and detailed engineering, onshore and offshore facilities installation and construction, operations support and custom designed equipment.

ICON is based in West Perth. We have successfully undertaken projects for clients in the USA, UK, Norway, South East Asia, New Zealand and Australia.

ICON is founded on openness, teamwork and delivering results. We understand our competitive edge is our people.
